- Text, image and audio editors (Microsoft Office, Photoshop, Audacity...).
- Advanced OS usage (Windows, Linux, Mac OS).

## **MOBILITY**

- Driver license (car and motorcycle).
- International and National mobility disponibility under conditions.

## **Work experience**

### **· Eurofirms: Full Stack Developer (March 2023 - Present)**

BuscoExtra: Ionic Angular App (Android - iOS), Admin (angular web-app), PHP Symfony API, BuscoExtra.es angular landing website, BuscoExtra blog (wordpress).

### **· Nielsen: Software Engineer (November 2019 - March 2023)**

Three main internal projects as a web application developer (*Item Price Simulator, Revenue Management Opportunities and Shelf Architect*):

Front-end: Angular, Karma (unit testing), Sass, AG Grid.

Back-end: API development using Java with Spring boot, also MongoDB and Snowflake.

All projects are product based apps (Retail Convergence) regarding stores stock and price simulation (impact, sell projection, etc.)

Scrum (code reviews, sprint plannings, daily meetings) and Continuous/Automatic Integration (Jenkins jobs and bitbucket with Azure) are daily used for work organisation.

### **· Telefónica Educación Digital: Mobile developer (March 2019 - November 2019)**

Multiple high security hybrid mobile applications developer (Android and iOS) using mainly Ionic framework with Angular, scss, Api integration and end-to end-testing.

App stores deployment using development accounts, project maintenance and user feedback to both the App Store and Google Play Store.

Top projects:

- *Profuturo Aula Digital* (E-learning app administration)
- *UEM Secure Exam* for tablets (data encryption)
- *Miriadax* and *Wecorp* apps (maintenance)

### **· Doers DF: Full Stack Developer (March 2017 - March 2019)**

Consultancy work. More than 30 different projects including:

- Webpages: *Greenpeace Spain, San Miguel, Clece, Macmillan, WorkCo, Teka, Worldvision, Suyae ORG, IGT, Vertize Gala, Capkelenn, Fundación Plan Internacional,*

*Konex...)* using customizable templates coded with twig (php pre-compiler) and Wordpress framework.

- Mobile hybrid applications with Ionic and Angular (*Ocensa, Nestlé, Ideas Camp, StepsLife*).

Languages used PHP, HTML, CSS, JavaScript, JQuery, SQL and AngularJS.

## **PERSONAL CREATIONS**

- [Dark Souls 3 mod](#) as a personal project, coded in C# modifying the memory slots of the game using Cheat Engine.
- Participated in community projects, such as mods (Cyberpunk 2077) or programming forums (Stack overflow).
- Personal projects in Python, C# and C++.
